**DBA Objectives** (in no particular order)

- <u>Standards</u>: Define and promote a template for Confluence documentation to be adhered to by all future pipelines and help to retrospectively adjust existing pipelines
- <u>Data Model</u>: Work with team to define our data model including reference tables, hourglass data flow and user tables.
- <u>Micro-projects</u>: Support the business by delivering 'quick win' solutions to individual user data needs as and when they arise
- <u>Training</u>: Design and deliver Python training slides / DataCamp workshops for DS and Ofgem staff
- <u>Product Development</u>: Take Social Obligations collection and reporting epics through the build phase
- <u>Glasgow Team</u>: Support the other DBA/AA roles in the agile approach and help create a local office identity
- <u>Product Support</u>: Write user stories as needed for existing pipelines such as Domestic Tariffs and work on scripts / Zeppelin solutions and visualizations
